The terminal disclaimer has been recorded.

Election/Restrictions

3. Claims 1-21 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 22-24, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Claims 1-24 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Art Unit: 1711

5. The following is an examiner's statement of reasons for allowance: The present invention relates to a radiation curable compositions comprising an alkenyl ether-functional polyisobutylene comprising at least 50 mol% of non-terminal isobutylene repeating units and at least one vinyl organosiloxane group having the formula in claims 1, 19, and 22, a cationic photoinitiator and a miscible reactive diluent selected from the groups listed in claims 1, 19, and 22; and, additionally methods of making said compositions and articles comprising the same.

The present claims are allowable over the prior art. In the examiner's opinion, the instantly claimed composition, methods of making said composition and methods of making articles comprising said composition is distinguished over the prior art. Although the prior art teaches polyisobutylene with hydrolysable silane groups, which can be further be functionalized with alkenyl ether groups, it is not suggested to convert said hydrolysable silane groups to radiation curable groups. The prior art additionally teaches radiation curable alkenyl ether functional groups, however these are polyorganosiloxane polymers verses polyisobutylene polymers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
